JUST ISSUED BY BLELOCK & CO., and a management of the philosophy of spiratualism—succent and modern—including Greek sybils, Roman anuary, Indian and Egyptian mysteries, all miracles—past and present—the Rinks, Kornan, Shaster, &c., entitled. "THE PHILOSOPHY OF LIFE, AS ENOLVED BY MODERN SCIENCE."

The Religion-Philosophical Journal says of it; "The author has given, in a vein of thought forvid and glowing as his own native clime, one of the fluest analyses of Spiritualism and its bleesings ever uttered to the world. He provent to be as scientific and philosophic religion, and explains it so clearly a skeptic must only wonder that he has not before investigated and accepted teachings so logical. He shows that it has existed from the beginning of time. He regards the Bible as a history of Spiritualism; showing that all people have had their exact books, from whence they draw inspiration, and an overvaling Power whom they worship by some smane; and that spirits have ever communed with mortals. His language is beautiful; his reasoning sound. He quotes froely from the secondist minds of the age. His book bears evidence at being the production of a cultured mind. He thus speaks in a candid april to all striving for truth "&c.

Where faith has faded under the sunlight of secondoc, it plants philosophy upon which hope and happiness may live and grow into a thery; and to thought of the depressed and opposed people of the unfortunate South, it will carry comfort and consolation, and wreather their lives with a new and higher charm than ever they possessed before.
